PROFESSIONAL SUMMARY

Backend Software Engineer with 4 years of experience building scalable fintech systems across Southeast Asia, focused on loan processing and compliance platforms. Designs distributed, event-driven Go microservices, AWS serverless architectures, with expertise in API design, asynchronous processing, third-party integrations, and workflow automation. Translates complex business and regulatory requirements into secure, fault-tolerant, auditable, high-availability backend systems.

TECHNICAL SKILLS

Languages: Go, JavaScript (Node.js), Python, SQL

Backend & Systems: Microservices, Distributed Systems, Event-Driven Architecture, REST API, GraphQL

Cloud & Infrastructure: AWS (Lambda, EventBridge, SQS, SNS, S3), Docker

Databases: PostgreSQL, MySQL, MongoDB

Workflow & Tools: Camunda BPMN, Appsmith, Datadog, Sentry, Postman, Swagger, Git

PROFESSIONAL EXPERIENCE

Funding Societies

Singapore (Remote)

Software Engineer

Jul 2024 – Present

- Engineered **AI-powered** bank statement parser with vendor fallback, reducing parsing time by **85%**, saving **\$6000+/month**
- Spearheaded event-driven **AWS Lambda** pipelines for document sync and credit workflows, reducing manual intervention
- Overhauled credit bureau pipeline from a **3-step to single-step** workflow, eliminating redundant pre-screening API calls
- Designed **centralized blocklist engine** with cascade logic, enabling audit traceability, preventing cross-entity fraud risks
- Accelerated **compliance** system delivery using **no-code** and **AI Agent**, cutting development cycles from **4 weeks to 5 days**

Software Engineer

Jul 2022 – Jun 2024

- Led **onboarding MVP** from concept to production, securing **\$200K** in funding, scaled across **Malaysia** and other products
- Contributed to serverless auto top-up platform on AWS **Step Functions**, reducing workload by **80%**, saving **\$150K** annually
- Integrated Questnet with **20+** validation checks, automating pre-screening across **30,000+** loans, saving **20 hours/week**
- Designed **Camunda BPMN** loan application workflow, processing **500+** daily applications across Southeast Asian markets

Software Engineer Intern

Jan 2022 – Jun 2022

- Developed a microservice integrating **12+** internal services, reducing loan processing time from **3 hours to 20 minutes**
- Integrated a credit reporting system, saving **\$20K annually**, reducing latency by 30%, resolving **75%** of production issues

ZOHO Corporation

Tamil Nadu, India

Summer Intern

May 2021 – Jun 2021

- Built a real-time facial recognition and landmark localization using OpenCV and Flask, delivering **92% accuracy** at **30 FPS**

PUBLICATIONS

- "Medi-Food Supply Chain Management Using IoT & Blockchain" - Patent Published, **App No. 202241043879**
- "Blockchain Based Agri-Food Supply Chain Management" - Published at PCCDS 2022

ACHIEVEMENTS

- Led a full-stack development workshop, mentoring beginner developers in building end-to-end web applications
- Winner - Ideathon** for designing an AI + Blockchain-based drug vending system with real-world applicability
- Runner-Up - National Hackathon** (CSI Chennai) for building an end-to-end blockchain product

EDUCATION

Anna University – Coimbatore Institute of Technology

Tamil Nadu, India

Bachelor of Information Technology | CGPA: 8.73/10

Aug 2018 – Jun 2022
